~~Footnote Summary~~

Site is land with a "natural" feel, heavy <sup>sensory</sup> elements <sup>are present</sup> such as smell, sounds, shades of green + earth tones for color + tactile sensations. Seems to be heavy vegetation, with lots of animal life, including ~~animal~~ life birds, insects + higher animals.

~~Water is present + seems to partially surround something~~  
Terrain features include cliffs, ~~cliffs~~, rocks, and sloping + rounded topographical forms.

In the area there are many dark skinned people + a village of natural materials. People are Primitive Culturally, socially, and technologically, including areas such as <sup>health care</sup> ~~medicine~~ farming, communication etc. ~~Animals~~ Animals seem to be more important to livelihood of people than does farming.

Site end  
10:30

Site strongly suggests African villagers of the tribe its currently trends to study (I forget the name). <sup>(people insensitive)</sup> They are just now in the verge of being inundated by "civilization". I got the impression they poach elephants, and are presently engaged in low-grade combat with an external entity or agency.
